

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. The whole length of road now owned by the company is 1,512 miles ; an extension of one hundred miles having been built during the past year under authority granted by the Legislature of Iowa at its last session, conferring on this company the land grant applicable to the construction of a road from Algona westward to a junction with the Sioux City & St. Paul Railroad, a distance of about eighty-five miles, on condition that the road should be completed by the first day of January, 1880. The grant was accepted, and the road completed during the year, with fifteen miles in addition, which takes the line to within twenty miles of the east line of Dakota Territory.

The land grant thus earned and inuring to this company, contains over two hundred thousand acres of choice land in Northwestern Iowa, which it is believed will meet with a ready sale. This extension has been constructed in the most substantial manner and at a very moderate cost, and has been paid for with the proceeds of bonds secured by a mortgage of this section of the road and equipment. It is well equipped with rolling stock, and will be a valuable feeder to the old line of road.

The entire cost of the company's property, including equipment, bridges, elevators, cattle-yards and grounds, is represented by

Common Stock.....	\$15,404,261
Preferred Stock.....	12,279,483
Mortgage Bonds.....	32,088,500
Making a total of.....	\$59,772,244

from which may be deducted certain assets which appear in the general account hereto appended, reducing the actual cost to \$58,068,494, an average of about \$38,400 per mile for the 1,512 miles of road.

In May last this company purchased the most of the stock and bonds of the Dubuque Southwestern Railroad, in Iowa, extending from Farley, a point on the Illinois Central Railroad twenty-three miles west of Dubuque, in a southwesterly direction fifty miles to Cedar Rapids. The road of this company extending from Sabula westerly, connected with the Dubuque Southwestern at Marion, six miles northerly from Cedar Rapids, and now runs to that city over that road, forming an important and long desired connection.

The Dubuque Southwestern runs through a fine agricultural region, its entire length, and at Anamosa passes the best stone quarries in the State, which are being extensively worked, and are furnishing no inconsiderable amount of business. The stock and bonds were purchased at a low price, and but a small amount will be further required to perfect the title of the road in this company. It is now being operated by this company in connection with the line from Sabula to Marion.

In 1871 this company purchased a portion of the first mortgage bonds of the Madison & Portage Railroad Company, which had then just completed its line from Madison to Portage City, in Wisconsin, a distance of about forty miles. This road connects our LaCrosse Division with our Prairie du Chien Division, about midway between Milwaukee and the Mississippi River, connecting the cities of Madison and Portage, and passing, for its entire distance, through a fine country. During the year just past, an opportunity was presented for securing the remainder of said bonds, and they were purchased, and the entire issue is now owned by this company. The road has been in possession of and operated by this company for the past seven years. Foreclosure proceedings upon said first mortgage are pending, and the property will soon be acquired thereunder at a moderate cost.

The Minnesota Midland Railway Company was organized in 1877, to construct a narrow gauge railway from Wabasha, on our River Division, westerly through the State of Minnesota; and in May, 1878, sixty miles of said road were completed, extending from Wabasha to Zumbrota, in Minnesota. This road runs through a very fine wheat country, which had heretofore been mainly tributary to the lines of this company. The control of the road being therefore deemed important, it was purchased at a very moderate cost, and the road is now in possession of and is being operated by this company.

The Viroqua Railway Company was organized during the past year, to construct a railway from Sparta, on the line of the LaCrosse Division, southwesterly to Viroqua, the county seat of Vernon County, Wisconsin, a distance of thirty-two miles, and municipal aid to the amount of fifty thousand dollars was secured therefor. This road when constructed will command the trade of a large extent of well settled territory now without railway facilities. On full examination of the premises, it was believed to be for the interests of this company to control and own the line; and an arrangement was made by which this object has been effected in a manner entirely satisfactory to this company. Ten miles of the road, extending from Viroqua Junction (two miles west of Sparta) have been constructed and are now in operation, and the remaining twenty-two miles will be built without delay.

It is the expectation of the company that these roads will, at no distant day, be absorbed by and the titles vested in this company.

The wheat crop of 1878 in Wisconsin, Minnesota and Northern Iowa, gave promise until near harvest time, of an unusually large yield ; but intervening rains and excessive heats inflicted serious damage, affecting both its quantity and quality. The following statement of wheat carried by this company eastward to lake ports, during the last four months of 1878, as compared with the same period of the preceding year, will give some idea of the extent of this misfortune, and of its effect direct and indirect on the earnings :

Wheat carried in the last four months of 1877, bushels, 10,009,498
“ “ “ “ “ “ 1878, “ 4,558,344

The company has now 523 miles of road laid with steel rails, 10,580 tons having been put in the track during the year 1878 ; and the following new equipment has been added, namely :

12 Locomotives.	271 Box Cars.
10 Passenger Cars.	89 Stock Cars.
5 Baggage, Mail and Express Cars.	65 Flat Cars.

The immunity from accidents involving personal injury with which the lines of the company have been operated, is again cause for congratulation.

Respectfully submitted,

ALEX. MITCHELL, President.

MILWAUKEE, 20th March, 1879.
